The **HMG Early Intervention** program aims to identify and serve children under the age of three with developmental delays and disabilities. Parents with concerns regarding their child's development can have their infant or toddler evaluated by an interdisciplinary team at absolutely no cost to the family. Children are evaluated for delays in the areas of adaptive, cognitive, communication, physical, and social-emotional development using appropriate diagnostic tools. Should intervention be deemed necessary, individualized services are provided to the child and family through a Service Coordinator who guides the family through every aspect of the process, from program entry until the child transitions out by age three.

The **HMG Home Visiting** program provides expectant or new parents with the information, support and encouragement they need through a voluntary, high-quality home visiting service. Parents are assigned a Home Visitor who comes to wherever the family lives. The Home Visitor is a friendly, trained, and experienced person who can answer questions about pregnancy or being a parent and can help find services that help families care for themselves and their children. By supporting the positive interaction with children in stable and stimulating environments, the Home Visiting program seeks to create a sturdy foundation for future achievement.
